

AMIkids Pensacola

United Way Funded Program:
AMIkids Pensacola

Funding Amount: \$21,000
1-year grant

Description of Program Services: AMIkids Pensacola is dedicated to helping troubled youth realize and achieve their potential, strengthen their community, and have a lasting impact on generations to come.

Impact Area: Education

Significant Statistics: According to the Department of Labor, high school graduates earn, on average, \$8,000-\$10,000 more than students who do not complete high school. This could be the difference between living at or above the poverty level for these students. When students earn their GED, they are able to continue on to either a better paying full-time job or secondary education.
